Petition To:
Modify Michigan Department of Resources Regulations regarding the Harvest of Brown Trout on the Au Sable River from Mio Dam to McKinley Bridge.

As anglers, sportsmen & women, and conservation minded citizens, we would like to make our opinions known in regards to a fish harvest regulation change for brown trout on the Au Sable river between Mio Dam and McKinley Bridge as proposed by the Au Sable Big Water Preservation Association (A.S.B.W.P.A.). This remarkable stretch of fish habitat will be depleted of it's prized brown trout under the current ***2 fish per day >15"*** regulations. We are petitioning for a re-classification to **Type 7** which would make this section of river "No Kill, Catch and Release, Artificial Flies Only".

Petitioned Action

Our position supports a **Type 7 Classification** from the power lines to McKinley Bridge on the Au Sable River. We strongly believe that this stretch should be managed as a **Trophy Brown Trout Fishery.**
